

BEWARE of the BLACK DEATH

The Black Death/Great Plague was one of the most devastating events to impact Europe. To this day, the idea of a plague of that magnitude is incredibly frightening to people who can trace their ancestry back to Europe in the Middle Ages.

The year is 1349. The Plague has just ravaged your town. Alongside a few other people, you survived. Now, it is your duty to warn a friend in a town the Plague has not yet reached. You need to design a Warning Poster (all writing in pen and any illustrations must be self-created and in color) to be sent to the town in hopes of informing your friend before it is too late...

Your Warning Poster must include:

- 1. What the Plague is**
- 2. How YOU think the Plague is spread**
- 3. Percentage of people it killed in your town**
- 4. What kinds of cures people are trying**
- 5. What symptoms people have**
- 6. What effect the Plague has had on your town**
- 7. Advice for avoiding the Plague**
- 8. Illustration (self-created)**
